

# HAT TRICK ST

To get the maximize yield potential, plants need to have the best possible even emergence. Early Seedlings use the nutrients and energy from the seed until they emerge and start using photosynthesis.

HAT TRICK ST is blend of 8 key nutrients for early seed development and a proprietary blend to help create ATP (energy) to give the young seedling the nutrition it needs.

HAT TRICK ST has a flexible formulation designed for use with various application practices. HAT TRICK ST can be mixed with fungicide and insecticide seed treatments as well as rhizobia/inoculant. HAT TRICK ST was designed to be applied simultaneously and also maybe applied as on over treatment.

## HAT TRICK ST

Proprietary blend that helps aid in ATP (energy) production and stimulate the seedling.

Unique blend of 8 essential Macro and Micro nutrients that provide all the same nutrients at the same time.

HAT TRICK ST is designed to provide essential nutrients which help maximize seedling vigor and crop development for maximizing yield potential. Hat Trick ST helps give every seed the same nutrients to help create the most even emergence stands.
